REPORT TO CONGRESS ON CEMENT KILN DUST

<u>Volume II: Methods and Findings</u>	<u>Page</u>
LIST OF ACRONYMS	
CHAPTER ONE: INTRODUCTION	1-1
1.0 PURPOSE AND SCOPE	1-1
1.1 GENERAL METHODS AND INFORMATION SOURCES	1-2
1.1.1 General Analytical Methods	1-3
1.1.2 EPA Data Collection Activities	1-3
A. 1991 Portland Cement Association (PCA) Survey of Cement Kiln Facilities	1-3
B. 1992 and 1993 CKD Sampling and Analysis	1-3
C. Damage Case Collection	1-4
D. EPA Site Visits	1-4
E. RCRA §3007 Waste and Site Characteristics Data Request	1-5
1.2 EPA'S DECISION MAKING RATIONALE	1-5
1.3 CONTENTS AND ORGANIZATION OF REPORT	1-7
CHAPTER TWO: CEMENT INDUSTRY OVERVIEW	2-1
2.0 INTRODUCTION AND DESCRIPTION OF CKD	2-1
2.1 CEMENT INDUSTRY STRUCTURE AND CHARACTERISTICS	2-1
2.1.1 What Is Cement?	2-1
2.1.2 The Cement Industry	2-5
2.2 CEMENT MANUFACTURING	2-9
2.2.1 The Basic Production Process	2-10
Mining	2-10
Crushing	2-10
Grinding and Blending	2-13
Pre-Drying	2-13
Drying and Preheating	2-13
Calcining	2-15
Burning	2-15
Cooling	2-15
Finish Milling/Loading	2-16
2.2.2 Kiln Design	2-16
Wet Process Kiln	2-18
Dry Process Kiln	2-19
Preheater Kiln	2-21
Precalciner Kiln	2-23
Semidry Process Kiln	2-23

CONTENTS (continued)

Volume II: Methods and Findings	Page
<p>Trends in Kiln Technology and Use</p> <p>2.2.3 Process Inputs</p> <ul style="list-style-type: none"> Raw (Feed) Materials Fuels <ul style="list-style-type: none"> Fossil Fuels Non-hazardous Waste Fuels Hazardous Waste Fuels Overview of the Hazardous Waste Fuels Industry Extent of Hazardous Waste Consumption by Cement Kilns and Types of Waste Burned Hazardous Waste Fuel Technologies Relevant Environmental Regulations <p>2.3 SUMMARY AND RELEVANCE TO SUBSEQUENT CHAPTERS</p>	2-25 2-26 2-26 2-33 2-37 2-39 2-40 2-40 2-41 2-42 2-42 2-43
CHAPTER THREE: CKD GENERATION AND CHARACTERISTICS	
<p>3.0 INTRODUCTION</p> <p>3.1 CKD GENERATION</p> <ul style="list-style-type: none"> 3.1.1 Dust Collection Devices 3.1.2 Plant-Level CKD Generation Rates 3.1.3 Quantities and Fate of CKD Generated <ul style="list-style-type: none"> Differences in CKD Generation Rates Across Process Types Differences in CKD Generation Rates Across Process Types and Fuel Usage Differences in Gross CKD Generation Rates Differences in Net CKD Generation Rates CKD Recycling Recycling Differences Differences in Fate of CKD Across Process Types Differences in Fate of CKD Across Process Types and Fuel Usage <p>3.2 CKD GROSS CHARACTERISTICS</p> <p>3.2.1 Physical Characteristics</p> <p>3.2.2 Bulk Chemical Characteristics</p> <p>3.3 CKD TRACE CHARACTERISTICS</p> <p>3.3.1 EPA Sampling Program</p> <p>3.3.2 Total Concentrations</p> <ul style="list-style-type: none"> Metals Dioxins and Furans General Chemistry Volatile Organics 	3-1 3-1 3-1 3-2 3-2 3-16 3-16 3-18 3-18 3-18 3-19 3-19 3-21 3-21 3-22 3-25 3-25 3-29 3-30 3-30 3-32 3-33 3-37 3-41 3-41

CONTENTS (continued)

Volume II: Methods and Findings	Page
Semi-Volatile Organics Pesticides PCBs Radionuclides	3-44 3-44 3-45 3-45
3.3.3 Leachable Concentrations	3-47
Metals Dioxins and Furans General Chemistry Volatile Organics Semi-Volatile Organics Pesticides PCBs Radionuclides	3-47 3-50 3-50 3-50 3-50 3-52 3-52 3-52
3.4 STATISTICAL ANALYSES OF CKD CHARACTERIZATION RESULTS	3-53
 3.4.1 Metals	3-53
 3.4.2 Dioxins and Furans	3-61
3.5 CLINKER CHARACTERISTICS	3-62
CHAPTER FOUR: CURRENT MANAGEMENT PRACTICES FOR CKD	4-1
4.0 INTRODUCTION	4-1
4.1 ON-SITE LAND DISPOSAL	4-1
 4.1.1 Landfills	4-2
 4.1.2 Piles	4-2
 4.1.3 Ponds	4-2
 4.1.4 Dimensions	4-3
 4.1.5 Codisposal	4-3
 4.1.6 Remaining Useful Life	4-3
4.2 POTENTIAL EXPOSURE PATHWAYS	4-4
 4.2.1 Ground Water	4-5
 4.2.2 Surface Water	4-6
 4.2.3 Air	4-6
4.3 ENVIRONMENTAL PROTECTION PRACTICES	4-7
4.4 BENEFICIAL USE OF CKD	4-9
 4.4.1 Waste Stabilization	4-10

CONTENTS (continued)

Volume II: Methods and Findings	Page
4.4.2 Soil Amendment (Fertilizer)	4-12
4.4.3 Liming Agent	4-12
4.4.4 Materials Additive	4-12
4.4.5 Road Base	4-13
4.4.6 Other Uses	4-13
CHAPTER FIVE: DOCUMENTED DAMAGES FROM MANAGEMENT OF CKD	5-1
5.0 INTRODUCTION AND METHODOLOGY	5-1
"Tests of Proof"	5-1
Identification of Prospective Damage Cases	5-2
Information Collection	5-2
Damage Case Preparation and Review	5-3
Limitations of the Damage Cases	5-3
5.1 OVERVIEW OF FINDINGS, TRENDS, AND CONCLUSIONS	5-4
5.1.1 Findings	5-4
5.1.2 Overall Trends and Conclusions	5-5
5.2 DOCUMENTED GROUND AND SURFACE WATER DAMAGE CASE SUMMARIES	5-9
Cases of Documented Damage	5-9
5.2.1 Holnam Incorporated, Mason City, Iowa	5-9
5.2.2 Lehigh Portland Cement Company, Leeds, Alabama	5-14
5.2.3 Lehigh Portland Cement Company, Mason City, Iowa	5-17
5.2.4 Portland Cement Company, Salt Lake City, Utah	5-22
5.2.5 Southwestern Portland Cement (Southdown, Inc.), Fairborn, Ohio ..	5-26
5.2.6 National Gypsum Co./Lafarge Corp., Alpena, Michigan	5-32
5.2.7 Ash Grove Cement West, Montana City, Montana	5-34
5.3 CASES OF POTENTIAL DAMAGE TO GROUND AND SURFACE WATER ..	5-37
5.3.1 Texas Industries, Inc., Midlothian, Texas	5-37
5.3.2 Holnam, Inc., Artesia, Mississippi	5-40
5.3.3 Markey Machinery Property, Seattle, Washington	5-41
5.4 DOCUMENTED AIR DAMAGES	5-45
5.5 CKD MANAGEMENT SCENARIOS OF CONCERN	5-49

CONTENTS (continued)

Volume II: Methods and Findings	Page
CHAPTER SIX: POTENTIAL DANGER TO HUMAN HEALTH AND THE ENVIRONMENT	6-1
6.0 INTRODUCTION	6-1
Purpose and Scope	6-1
Overview of Approach	6-2
Major Results and Conclusions	6-4
6.1 INITIAL RISK SCREENING	6-6
6.1.1 Approach and Methods	6-6
CKD Composition Data	6-6
Risk-Screening Criteria	6-7
Other Constituent-Specific Factors	6-10
6.1.2 Risk-Screening Results	6-11
6.2 EVALUATION OF RISKS WHEN CKD IS MANAGED ON SITE	6-14
6.2.1 Risk Potential Ranking of Initial Case Studies	6-15
Approach and Methods	6-15
Results of Risk Potential Ranking	6-19
<u>Risk Potential Ranking for the Ground-water Pathway</u>	<u>6-20</u>
<u>Risk Potential Ranking for the Surface Water Pathway</u>	<u>6-23</u>
<u>Risk Potential Ranking for the Air Pathway</u>	<u>6-26</u>
6.2.2 Risk Modeling of On-site CKD Management	6-29
Analytical Methodology	6-29
<u>Release, Fate, and Transport Modeling Methodology</u>	<u>6-32</u>
<u>Characterization of Exposed Populations</u>	<u>6-34</u>
<u>Exposure Assessment and Risk Characterization</u>	<u>6-35</u>
<u>Sensitivity Analysis of Higher Risk Potential Scenarios</u>	<u>6-38</u>
Results of On-site Risk Modeling	6-40
<u>Baseline On-site CKD Management</u>	<u>6-40</u>
<u>Sensitivity Analysis of Potentially Higher Risk Scenarios</u>	<u>6-45</u>
6.2.3 Summary of Risks from On-site CKD Management	6-51
Ground-Water Risks	6-51
Surface Water Risks to Human Health	6-52
Aquatic Ecological Risks	6-52
Air Pathway Risks from Windblown Dust	6-52
6.3 EVALUATION OF RISKS FROM OFF-SITE BENEFICIAL USES OF CKD	6-53
6.3.1 Approach and Methods	6-54
6.3.2 Hazardous Waste Stabilization and Disposal	6-54
6.3.3 Sewage Sludge Treatment and Use	6-56

CONTENTS (continued)

Volume II: Methods and Findings	Page
6.3.4 Building Materials Addition	6-57
6.3.5 Road Construction	6-58
Analysis of Risk Factors	6-58
Risk Modeling Results for Unpaved Traffic Surfaces	6-59
6.3.6 Agricultural Liming	6-60
Analysis of Risk Factors	6-60
Risk Modeling Results for Liming	6-62
6.3.7 Summary of Risks from Off-site Beneficial Uses	6-63
CHAPTER SEVEN: EXISTING REGULATORY CONTROLS ON CKD MANAGEMENT	7-1
7.0 INTRODUCTION AND METHODS	7-1
7.0.1 Objectives	7-1
7.0.2 Methodology	7-1
7.0.3 Summary of Findings	7-2
7.0.4 Limitations of the Analysis	7-4
7.1 AIR	7-5
7.1.1 Federal Controls	7-5
Clean Air Act	7-5
Implementing Regulations	7-5
State Implementation Plans	7-5
New Source Performance Standards	7-6
Prevention of Significant Deterioration	7-6
Nonattainment Review	7-7
Hazardous Air Pollutants	7-7
Boiler and Industrial Furnace Regulations	7-8
7.1.2 State Controls	7-9
California	7-10
Ambient Air Quality Standards	7-11
Authority To Construct	7-11
Permit To Operate	7-12
Prevention of Significant Deterioration and New Source Review	7-12
Michigan	7-13
Ambient Air Quality and Permits	7-13
Particulate Matter and Visible Emissions Limitations	7-14
Pennsylvania	7-14
Nonattainment Review	7-15
Particulate Matter and Visible Emissions Limitations	7-15
Texas	7-16
Other Requirements Applicable to Cement Plants	7-16
Special Report on Texas Cement Plants' Excess Emissions	7-18

CONTENTS (continued)

Volume II: Methods and Findings	Page
7.2 WATER	7-18
7.2.1 Federal Controls	7-18
The Clean Water Act	7-18
Safe Drinking Water Act	7-20
7.2.2 State Controls	7-21
California	7-22
<u>Process Wastewater Requirements</u>	7-23
<u>Water Quality Standards</u>	7-23
<u>Stormwater Management Requirements</u>	7-24
Michigan	7-24
<u>Water Quality Standards</u>	7-25
<u>Ground-Water Protection</u>	7-25
Pennsylvania	7-25
<u>Water Quality Standards</u>	7-26
<u>Ground-Water Protection</u>	7-26
<u>Stormwater Management Requirements</u>	7-27
Texas	7-27
<u>Water Quality Standards</u>	7-28
<u>Ground-Water Protection</u>	7-28
<u>Stormwater Management Requirements</u>	7-29
7.3 SOLID WASTE MANAGEMENT	7-29
7.3.1 Federal Controls	7-30
The Resource Conservation and Recovery Act	7-30
Boiler and Industrial Furnace Rule	7-31
Comprehensive Environmental Response, Compensation, and Liability Act	7-32
7.3.2 State Controls	7-32
California	7-33
Michigan	7-36
Pennsylvania	7-37
Texas	7-40
CHAPTER EIGHT: ALTERNATIVE CKD MANAGEMENT PRACTICES AND POTENTIAL UTILIZATION	8-1
8.0 OVERVIEW	8-1
8.1 MINIMIZATION OF CKD REMOVAL FROM THE KILN SYSTEM	8-2
8.1.1 Control of CKD Generation Rates	8-2
8.1.2 Direct Return of CKD to the Kiln	8-3
Return to Flame End	8-5
Return with Raw Feed	8-5
8.1.3 Treatment and Return of CKD to the Kiln	8-6

CONTENTS (continued)

Volume II: Methods and Findings	Page
Pelletizing	8-6
Leaching with Water	8-6
Leaching with a Potassium Chloride Solution	8-8
Alkali Volatilization	8-8
Recovery Scrubbing	8-9
Fluid Bed Dust Recovery	8-13
8.2 BENEFICIAL USE OF REMOVED CKD	8-16
8.2.1 Stabilization of Sludges, Wastes, and Contaminated Soils	8-17
Sewage Sludge	8-17
Oil Sludge	8-21
Acid Waste	8-22
Miscellaneous Wastes and Contaminated Soils	8-23
8.2.2 Soil Stabilization	8-24
8.2.3 Land Reclamation	8-24
8.2.4 Agricultural Applications	8-25
Fertilizer	8-25
Liming Agent	8-28
8.2.5 Livestock Feed Ingredient	8-28
8.2.6 Lime-Alum Coagulation in Water Treatment	8-31
8.2.7 Construction Applications	8-31
Blending with Portland Cement	8-32
CKD as the Only Blending Agent	8-32
CKD as a Co-Blending Agent	8-33
Use as a Road Base Material	8-34
8.2.8 Sanitary Landfill Daily Cover	8-35
8.2.9 Mineral Filler	8-36
8.2.10 Lightweight Aggregate	8-36
8.2.11 Glass Making	8-36
8.3 ON-SITE LAND DISPOSAL	8-36
8.4 SUMMARY AND FINDINGS	8-38
8.4.1 Technical Feasibility	8-43
8.4.2 Human Health/Environmental Considerations	8-44
8.4.3 Economic Feasibility	8-44
8.4.4 Current Extent of Use and Trends	8-45

CONTENTS (continued)

Volume II: Methods and Findings	Page
CHAPTER NINE: COST AND ECONOMIC IMPACTS OF ALTERNATIVES TO CURRENT CKD DISPOSAL PRACTICES	9-1
9.0 INTRODUCTION	9-1
9.1 APPROACH AND METHODS	9-1
9.1.1 Data Sources	9-2
9.1.2 Approach to Estimating Costs and Impacts of CKD Management Alternatives	9-2
Case Study Plants	9-2
Methods for Estimating Facility Costs	9-3
Methods for Extrapolating from the Case Study Sample to the Industry	9-4
9.1.3 Cost Accounting Assumptions	9-5
9.1.4 Limitations of the Analysis	9-5
9.2 DESCRIPTIONS AND COSTS OF BASELINE AND ALTERNATIVE CKD MANAGEMENT METHODS	9-6
9.2.1 Current Practices	9-7
Direct Recycling of Collected Dust	9-8
Off-Site Beneficial Use	9-9
Current Land Disposal Practices	9-9
9.2.2 Alternative Land Disposal Practices	9-10
Conventional Subtitle C Technology and Administrative Standards	9-10
Subtitle C Costs (Exclusive of Corrective Action Costs)	9-11
Potential Subtitle C Corrective Action Costs	9-11
Alternative Subtitle C Costs Under RCRA §3004(x)	9-14
Tailored Contaminant Release Controls	9-15
9.2.3 Alternative On-Site CKD Recycling and Recovery Techniques	9-19
Increasing Direct CKD Recycling	9-19
Innovative CKD Recovery Technologies	9-20
Alkali Leaching	9-22
Fluid Bed Dust Recovery	9-26
The Passamaquoddy Technology Flue Gas Desulfurization Process	9-28
9.2.4 Other Operating Practices	9-31
Revised Standards for Cement Products	9-31
Curtailing Use of Hazardous Waste Fuels	9-32
9.2.5 Summary of the Costs of Alternative CKD Management Methods	9-34
9.3 POTENTIAL IMPACTS OF ALTERNATIVE MANAGEMENT PRACTICES	9-37

CONTENTS (continued)

Volume II: Methods and Findings	Page
9.3.1 Individual Plant-Level Impacts 9.3.2 Nationwide Cement Industry Impacts 9.3.3 Conclusions and Relationships to Regulatory Requirements CHAPTER TEN: STUDY FINDINGS AND REGULATORY OPTIONS 10.1 Study Findings 10.1.1 Sources and Volumes of Waste (Study Factor 1) 10.1.2 Waste Management Practices (Study Factors 2 and 8) 10.1.3 Waste Characteristics and Potential Risks to Human Health and the Environment (Study Factor 3) 10.1.4 Documented Evidence of Damage (Study Factor 4) 10.1.5 Potential Costs and Impacts of Subtitle C Regulation (Study Factors 5, 6, and 7) 10.2 Environmental Justice 10.3 Recommendations 10.3.1 Decision Rationale and Options 10.3.2 Regulatory Options 10.3.3 Next Steps GLOSSARY BIBLIOGRAPHY	9-37 9-40 9-43 10-1 10-1 10-1 10-2 10-2 10-4 10-4 10-5 10-5 10-5 10-7 10-11

LIST OF EXHIBITS
REPORT TO CONGRESS ON CEMENT KILN DUST

Volume II: Methods and Findings		Page
Exhibit 2-1	General Cement Types and Uses	2-2
Exhibit 2-2	1990 Clinker Production by State	2-6
Exhibit 2-3	Geographic Distribution of Active Portland Cement Production Facilities in 1991 in the U.S.	2-7
Exhibit 2-4	U.S. Clinker Capacity for the Period 1973-1991	2-9
Exhibit 2-5	Steps in the Manufacture of Portland Cement	2-11
Exhibit 2-6	Material Temperature Ranges in the Kiln Portion of the Cement Manufacturing Process	2-14
Exhibit 2-7	Typical Energy Requirements for Each Kiln Type	2-18
Exhibit 2-8	Typical Process Flow Diagram for a Wet Process Cement Kiln	2-20
Exhibit 2-9	Typical Process Flow Diagram for a Suspension Flash Preheater Cement Kiln	2-22
Exhibit 2-10	Typical Process Flow Diagram for a Precalciner Coal and Waste Fired Cement Kiln	2-24
Exhibit 2-11	Age and Capacity of Existing Kilns	2-25
Exhibit 2-12	Feed Mixtures in 1990	2-28
Exhibit 2-13	Feed Mixtures in 1985	2-29
Exhibit 2-14	Raw Material Consumption in 1990 and 1985	2-30
Exhibit 2-15	Typical Composition of Raw Materials	2-31
Exhibit 2-16	Typical Feed Mixtures in 1990	2-32
Exhibit 2-17	Cement Kiln Fuel Consumption in 1990 and 1985	2-34
Exhibit 2-18	Cement Kiln Fuel Mixtures in 1990	2-35
Exhibit 2-19	Cement Kiln Fuel Mixtures in 1985	2-36
Exhibit 2-20	Average Coal Composition by Rank	2-38
Exhibit 2-21	Coal Producing Regions of the United States and Coal Types Produced	2-38
Exhibit 2-22	Nominal Fossil Fuel Prices in 1985 and 1990	2-39
Exhibit 2-23	Breakdown of Solid Waste Fuel Consumption	2-40
Exhibit 2-24	Breakdown of Hazardous Waste Fuel Consumption	2-41
Exhibit 3-1	Flow Chart of Gross CKD Management Pathways	3-2
Exhibit 3-2	Air Pollution Control Devices Used at Cement Kilns	3-4

LIST OF EXHIBITS (continued)

Volume II: Methods and Findings		Page
Exhibit 3-3	Schematic Diagrams of Common Types of Air Pollution Control Devices	3-5
Exhibit 3-4	1990 Gross CKD Collection by Different Types of Air Pollution Control Devices	3-7
Exhibit 3-5	Relationship Between Net and Gross CKD Generated in 1990	3-8
Exhibit 3-6	Gross and Net CKD Generated (1990)	3-10
Exhibit 3-7	Share of Net CKD Generated and Clinker Production Capacity (1990)	3-11
Exhibit 3-8	Facilities With High Net CKD Generation Relative to Clinker Capacity	3-12
Exhibit 3-9	Percentages of Gross CKD Recycled, Sold, and Wasted (1990)	3-13
Exhibit 3-10	Recycling Rates Among Facilities That Operate Dry Kilns	3-14
Exhibit 3-11	Recycling Rates Among Facilities That Operate Wet Kilns	3-15
Exhibit 3-12	Average CKD Generation Rates Per Ton of Product (1990)	3-17
Exhibit 3-13	Fate of CKD as a Percent of Gross CKD (1990)	3-23
Exhibit 3-14	Particle Size Distribution of CKD by Process Type	3-26
Exhibit 3-15	Particle Size Distribution of CKD Midwest Portland Cement Company, Zanesville, Ohio	3-27
Exhibit 3-16	Hydraulic Conductivity of Freshly Generated and Managed CKD	3-29
Exhibit 3-17	Typical CKD Bulk Constituents	3-31
Exhibit 3-18	Trace Metal Concentrations in As Generated CKD	3-34
Exhibit 3-19	Trace Metal Concentrations in As Managed CKD	3-36
Exhibit 3-20	Trace Elements Commonly Found in Native Soils	3-37
Exhibit 3-21	Total Concentrations of Dioxins and Dibenzofurans in As Generated CKD	3-39
Exhibit 3-22	Total Concentrations of Dioxins and Dibenzofurans in As Managed CKD	3-40
Exhibit 3-23	Summary of Dioxin and Dibenzofuran Concentrations in CKD	3-42
Exhibit 3-24	Summary of Combined 1992-1993 Dioxin/Furan Sampling Results CKD 2,3,7,8, TCDD Toxicity Equivalence	3-43
Exhibit 3-25	Comparison of Maximum and Average Metals Concentrations in As Generated Dust with TC Standards	3-48
Exhibit 3-26	Comparison of Maximum and Average Metals Concentrations in As Managed Dust with TC Standards	3-49

LIST OF EXHIBITS (continued)

Volume II: Methods and Findings	Page
Exhibit 3-27 TCLP Concentrations of Dioxins and Dibenzofurans in As Generated CKD	3-51
Exhibit 3-28 T-test Comparison of Fuel Burning Effects on Metals Concentrations	3-56
Exhibit 3-29 T-test Comparison of Kiln Type on Metals Concentrations	3-58
Exhibit 3-30 Analytical Results of Clinker Analyses for Inorganics By Fuel Type	3-64
Exhibit 4-1 1991 CKD Waste Management Unit Dimensions	4-3
Exhibit 4-2 Remaining Life of Waste Management Units	4-4
Exhibit 4-3 Typical Cement Plant Layout	4-5
Exhibit 4-4 Environmental Protection Practices at CKD Waste Management Units Active in 1990, by Kiln Fuel Use Type	4-8
Exhibit 4-5 Estimated Off-Site Uses for CKD Sold/Given Away	4-11
Exhibit 5-1 Summary of Cases of Documented and Potential Damage to Human Health and/or Environmental	5-4
Exhibit 5-2 Summary of Documented Water Damages	5-6
Exhibit 5-3 Cases of Potential Damage	5-8
Exhibit 5-4 Site Diagram – Holnam Incorporated, Mason City, Iowa	5-10
Exhibit 5-5 Site Diagram – Lehigh Portland Cement Company, Leeds, Alabama	5-15
Exhibit 5-6 Site Diagram – Lehigh Portland Cement Company, Mason City, Iowa	5-18
Exhibit 5-7 Site Diagram – Lime Creek Nature Center (Lehigh Portland Cement), Mason City, Iowa	5-19
Exhibit 5-8 Site Diagram – Portland Cement Company, Salt Lake City, Utah	5-24
Exhibit 5-9 Site Diagram – Southwestern Portland Cement, Fairborn, Ohio	5-28
Exhibit 5-10 Summary of Exceedances of State Metals Limits Southwestern Portland Cement - Fairborn, Ohio Landfill #6	5-29
Exhibit 5-11 Site Diagram – National Gypsum Co./LaFarge Corp., Alpena, Michigan	5-33
Exhibit 5-12 Summary of Exceedances of State Metals Limits National Gypsum Co./Lafarge Corp., Alpena, Michigan	5-34
Exhibit 5-13 Site Diagram – Ash Grove Cement West, Montana City, Montana	5-36
Exhibit 5-14 Site Diagram – Texas Industries, Inc., Midlothian, Texas	5-38

LIST OF EXHIBITS (continued)

Volume II: Methods and Findings	Page
Exhibit 5-17 Summary of Air Damage Case Findings	5-46
Exhibit 5-18 Example of CKD Disposal Adjacent to an Agricultural Field	5-50
Exhibit 6-1 Overview of Risk Assessment Methodology	6-3
Exhibit 6-2 Basis for Risk-Screening Criteria	6-9
Exhibit 6-3 CKD Constituents That Exceeded Risk-Screening Criteria at EPA Sample Facilities	6-12
Exhibit 6-4 Comparison of 15 Sample Facilities to Other Facilities	6-16
Exhibit 6-5 Site Specific Factors Used to Evaluate Risk Potential of On-Site CKD Management	6-18
Exhibit 6-6 Risk Potential Rankings for the Ground-water Pathway	6-21
Exhibit 6-7 Risk Potential Rankings for the Surface Water Pathway	6-24
Exhibit 6-8 Particle Size Distribution of CKD by Kiln Type	6-27
Exhibit 6-9 Risk Potential Rankings for the Air Pathway	6-28
Exhibit 6-10 Graphical Illustration of On-site Risk Modeling Scenarios	6-31
Exhibit 6-11 Aquatic Ecological Benchmark Levels	6-38
Exhibit 6-12 Baseline On-Site Management Cancer Risks for Direct Exposure Pathways for 15 Case Study Facilities	6-41
Exhibit 6-13 Baseline On-Site Management Cancer Risks for Foodchain Exposure Pathways for 15 Case Study Facilities	6-42
Exhibit 6-14 Constituents Contributing to Adverse Health Effects In On-site CKD Risk Modeling Analysis	6-43
Exhibit 6-15 Results of Central Tendency and High End Ecological Effects Analysis	6-45
Exhibit 6-16 Sensitivity Analysis of Maximum CDD/CDF Cancer Risks for Direct Exposure Pathways	6-46
Exhibit 6-17 Sensitivity Analysis of Maximum CDD/CDF Cancer Risks for Foodchain Exposure Pathways	6-47
Exhibit 6-18 Sensitivity Analysis of Location Adjacent to Agricultural Field for Foodchain Exposure Pathways	6-48
Exhibit 6-19 Sensitivity Analysis of Location Adjacent to Surface Water for Direct and Foodchain Exposure Pathways	6-49
Exhibit 6-20 Sensitivity Analysis of Highly Exposed Individuals for Foodchain Exposure Pathways	6-50
Exhibit 6-21 Off-site Beneficial Uses Examined in the Risk Assessment	6-54

LIST OF EXHIBITS (continued)

Volume II: Methods and Findings		Page
Exhibit 7-1	New Source Performance Standards for Portland Cement Plants	7-7
Exhibit 7-2	Summary of State Air Pollution Controls	7-10
Exhibit 7-3	Summary of State Water Pollution Controls	7-21
Exhibit 7-4	Summary of State Solid Waste Management Controls	7-33
Exhibit 8-1	Flow Chart of Gross CKD Management Pathways	8-1
Exhibit 8-2	Process Flow Diagram of Recovery Scrubber	8-10
Exhibit 8-3	Process Flow Diagram of Fluid Bed Dust Recovery Process	8-15
Exhibit 8-4	Summary of Alternatives for Minimization of CKD Removal from the Kiln System	8-39
Exhibit 8-5	Summary of Alternatives for Beneficial Utilization of CKD Removed from the Kiln System	8-41
Exhibit 9-1	Facilities Included in the Cost Analysis	9-3
Exhibit 9-2	Subtitle C Disposal Costs	9-12
Exhibit 9-3	Subtitle C-Minus Disposal Costs	9-15
Exhibit 9-4	Tailored Contaminant Release Controls Costs: Continued Sales of CKD for Off-Site Use	9-17
Exhibit 9-5	Tailored Contaminant Release Controls Costs: Curtailed Sales of CKD for Off-Site Use	9-18
Exhibit 9-6	Key Design Conditions for the Nine Case Study Cement Plants	9-23
Exhibit 9-7	Estimated Incremental Net Costs for the Alkali Leaching System	9-25
Exhibit 9-8	Estimated Incremental Net Costs for the Fuller Fluidized Bed System	9-27
Exhibit 9-9	Estimated Incremental Net Costs for the Passamaquoddy Technology Recovery Scrubbing Process	9-30
Exhibit 9-10	Economic Benefits from Burning Hazardous Waste Fuels	9-33
Exhibit 9-11	Total Incremental Annualized Costs of CKD Management Alternatives for EPA Case Study Cement Plants	9-35
Exhibit 9-12	Annualized Incremental Costs of CKD Management Alternatives per Metric Ton of CKD for EPA Case Study Cement Plants	9-36
Exhibit 9-13	Annualized Incremental Costs of CKD Management Alternatives per Metric Ton of Cement for EPA Case Study Cement Plants	9-38
Exhibit 9-14	Capital Investment Requirements for Implementing CKD Management Alternatives for EPA Case Study Cement Plants	9-39

LIST OF EXHIBITS (continued)

Volume II: Methods and Findings		Page
Exhibit 9-15	Incremental Costs of Alternative CKD Management Practices Relative to Value of Cement Sales (Incremental cost per ton of cement/revenue per ton of cement — cents per dollar of sales)	9-41
Exhibit 9-16	Industry Wide Costs of Alternative Management Practices (Cost in \$ Million)	9-42
